

LATEST NEWS

Our first (and Islay's first) Boat Jumble was held on Saturday, 30 July and a very successful event it was. Many folk grabbed a bargain and the sun shone brightly making it a beautiful day! The event also gave folk a chance to take a look around the new Islay Marine Centre premises including our well stocked chandlery. Click on the images above for larger photos. For more information take a look at the [website](#) and watch this space for the date of our next jumble!

The photos right and left show a new 5 metre Tope Hunter fitted with a new model 50hp Yamaha. This ALL NEW model Tope Hunter has clean lines and a full internal moulding which allows a very large front storage locker. All electronics can be flush mounted; dash is wrap-around type which has a mounting area for the outboard clocks. There is also a moulded step forward for stepping aboard pontoons or harbours, the stern lockers have been made bigger and this has also made the stern seats bigger than the old shape Tope Hunter. All in all this is a big step forward in the layout of the Tope Hunter but the important thing is the Hull shape stays the same, as she has a unique and capable hull which has been well proven from all corners of the UK. Click on the images for larger photos.

13-14th August saw the Annual Islay Tope Fishing Competition, starting from Bowmore Harbour. Unfortunately, due to adverse weather and the amount of freshwater in the loch, the Tope stayed away! Here are some pictures anyway (below – click for larger images). Many thanks to all the competitors and sponsors of the event. Better luck next year!

**11th September** - Port Ellen fishing day was also cancelled due to the weather. We will try for another weekend - check the [Latest News](#) section on the website home page for details as they are announced.

**LAST 4 IN STOCK!!! - New McMurdo FASTFIND Satellite Personal Location Beacon (PLB).** Have you ever wondered what would happen if you fell over board and there was no-one to rescue you? The FASTFIND PLB provides confidence that when activated it will contact the world's professional search and rescue services directly. It does so by transmitting 2 signals simultaneously, one to the global 406 MHz satellite system and the other (121.5MHz) is a homing signal designed to speed up the local recovery response process. Please contact us for availability.

**LIFEJACKETS-** both manual and automatic available at competitive prices.

For all enquiries please contact Gus Newman on: tel: 01496 300129 or [gus@stormcats.co.uk](mailto:gus@stormcats.co.uk) or visit our websites: <http://islay-marine-centre.com> and <http://stormcats-islay.com> If you wish to be unsubscribed from this newsletter please [click here](#) and send us the return email and you will be removed from our mailing list.
